CAREER OBJECTIVE

Graduating student with a Bachelor of Science in Information Technology, opportunistic to apply technical abilities in Programming and DevOps to build innovation in expanding industry leading technology and cultures. Motivated to excel in diverse environments to build lifelong skills.

EDUCATION

Bachelor of Science in Information Technology **University of Technology Sydney (UTS)**

Feb 2019 - May 2024
(expected)

- Business Information Systems Management Major, Interaction Design Submajor
- Specialisation in electives: Software Engineering, Programming and Computer Science
- GPA 6.4/7 (High Distinction Average) with High interest in Team-Oriented Subjects

EMPLOYMENT / WORK EXPERIENCE

Junior Projects Programmer (Full-Time)

thankQ IT Solutions

Dec 2022 - July 2023

- Coded bug fixes for frontend/backend technologies in SQL, C#, and HTML
- Executed AGILE development methodologies to swiftly deliver new features, changes and adhoc bug fixes, meeting or exceeding project deadlines
- Developed and maintained dynamic web portals using Umbraco CMS delivering user-friendly and scalable solutions, while mitigating security vulnerabilities during planning

Key Achievements

- Independently developed a robust C# tool with Visual Studio automating failed API calls from SQL databases, reducing manual intervention and resolution times by over 200%
- Utilised Protractor and Angular to fully automate testing for new web modules, drastically transforming a full day of testing for integration issues into minutes

Risks and Challenges

- Eliciting unclear development specifications and possible mitigating scope creep
- Dependency risks in using third party applications and external libraries in softwares

QA/Programmer (Internship)

thankQ IT Solutions

Mar 2022 - Dec 2022

- Created test cases and conducted quality assurance testing with new developments
- Facilitated concise communication in teams, regarding bug reports and proposed fixes
- Performed routine maintenance and updates on SQL scripts to uphold data integrity

Key Achievements

- Navigating and managing four code bases in distinct programming languages, showcasing adaptability with a rapid learning curve all with a positive attitude
- Proactively learning independently and assigning self tasks with little supervision

Risks and Challenges

- Reducing technical debt through consistent coding practices through code reviews

TECHNICAL SKILLS

Languages

SQL, python, C++, C#, .NET, Java, HTML, JavaScript

Technologies

Visual Studio, Github, Microsoft Office, Adobe Suite,
Tools (Jira, Jenkins, Postman), Plastic SCM (Unity Version Control)
