CAREER OBJECTIVE

Final year university student in Bachelor of Science in Information Technology. Applying my technical abilities in Programming and DevOps to further innovation and ideas in both expanding a company's development and culture. Confident ability to always be a motivating force in the workplace, keen on thriving in different environments to learn lifelong skills.

EDUCATION

Bachelor of Science in Information Technology
University of Technology Sydney (UTS)

Feb 2019 - Dec 2023
(expected)

- Business Information Systems Management Major, Interaction Design Submajor
- Specialisation in electives: Software Engineering, Programming and Computer Science
- GPA 6.4/7 (High Distinction Average) with High interest in Team-Oriented Subjects

EMPLOYMENT

Junior Projects Programmer (Full-Time)

Dec 2022 - July 2023

- Developed a vital software tool to manage and automate failed API calls, decreasing the time spent on manual labour by more than 200%
- Facilitated communication between the software development and business teams
- Developed bug fixes for frontend/backend technologies showing fullstack capabilities
- Created clear key software documentation files independently for bug fixes

QA/Programmer (Internship)

Mar 2022 - Dec 2022

- Demonstrated strong communication skills when discussing potential bugs and fixes
- Created, managed and updated important testing software documentation
- Displayed strong problem solving skills with different code bases and languages

Pick Packer (Part-Time)

Mar 2021 - June 2021

- Managed communications and client requests face-to-face
- Documented and maintained orders from supplying clients on both system and paper
- Packed, weighed and stored produce from clients

Referees available upon request

TECHNICAL SKILLS

Languages

SQL, Python, C++, C#, dotNET, Java, HTML, JavaScript

Software

Github, Visual Studio, Microsoft Office and Tools (Excel, Powerpoint, Teams, Outlook, Adobe Suite), Plastic SCM (Unity Version Control)

TRANSFERABLE SKILLS

Communication and Teamwork Skills

Worked with members of the local community, as well as facilitating communication between development and business teams. Relationship management between clients and colleagues and understanding how to effectively work with different personality types in the workplace.

Driven to motivate others and to bring a positive impact to an organisation's culture.

Self Disciplined and Proactive

Coordinated independent programming and extracurricular interest projects till completion. Working within a team environment requires proactive communication to resolve problems. Projects require a disciplined mindset in how tasks are to be completed.

Attentive to Details and Creative

Developed very attentive skills to small details within problems and team operations with a keen eye for opportunities to streamline or increase workflow efficiency in my teams' project. Working in design extracurriculars also enables a client and customer-driven approach.

Organisation and Time Management Skills

Demonstrated such skills through graphic design work with clients for their businesses, despite juggling studies and other life commitments. When communicating and working with multiple departments, management is done in a timely manner with clear messages sent.

Other Languages: Vietnamese

EXTRACURRICULAR ACTIVITIES

Graphic Design and Digital Prints
